

```
public class TrackingCoordinator {  
    private TrackerService tracker = new TrackerService();  
    private AlertService alert = new AlertService();  
    private ReportService reporter = new ReportService();  
  
    public void process() {  
        String loc = tracker.trackVehicle("X123");  
        if (loc.equals("restricted")) {  
            alert.sendAlert("X123 entered restricted zone");  
        }  
        reporter.log(loc);  
    }  
}
```
